Connecting a machine running Mac OS X to the Personal Devices wifi

The screenshots in this guide were taken in Mac OS X 10.6. The appearance of your machine may vary slightly.

Select the *Personal Devices* network from the Airport menu.

Enter your Marlington username and password into the authentication dialog.

The network "Personal Devices" requires a password.					
User Name:	b_davis				
Password:	••••••				
802.1X:	Automatic				
	🗹 Remember this network				
	Cancel OK				

Click *Continue* to accept the security certificate and, if prompted, enter your computer administrator password to save the security certificate.

000	Verify Certificate			
	Authenticating to network "Personal Devices" Before authenticating to server "radius.dukes.lan", you should examine the server's certificate to ensure that it is appropriate for this network. To view the certificate, click 'Show Certificate'.			Type your password to make changes to your Certificate Trust Settings. Name: ladmin Password:
?	Show Certificate Cancel Continue		► Details	Cancel OK

Congratulations! You are now connected to the Internet.
