

Where is the Danger Zone?

The Danger Zone for a school bus is 10 feet around the bus.

**The two most dangerous places are:
Front of the bus
Right rear tire area**

Please talk to your child about the following safety rules:
Avoid the danger zone around the bus.

Don't try to pick up something dropped near the bus - the bus driver might not see you.

Remember that some motorists don't always stop for a stopped school bus.

Be careful whenever getting on or off the bus.

What do the Warning Lights Mean?

- Alternating flashing amber (yellow) lights are to be used to warn motorists that the bus is stopping to take on or to discharge passengers.
- Alternating flashing red lights are to be used to inform motorists that the bus is topped on the roadway to take on or discharge passengers.
- Stop arm shall be operated simultaneously with flashing red signal lights. A white flashing strobe light, individually switched, may be used, when unfavorable atmospheric conditions or time of day limit visibility (i.e., fog, rain, snow, darkness).
- Four-way hazard lights shall be activated at railroad crossings and a turn-around unless prohibited by local ordinance.
- Headlights should be actuated during operation of the school bus.

School bus safety is a team effort. ---- Nothing is more precious than a child's life.
